

CleanEquity Monaco sets date for 2011 conference

London, UK, (4 August 2010). CleanEquity Monaco 2011, the conference for emerging clean technologies, will take place on the 3rd, 4th March 2011. Innovator Capital, a London specialist investment bank, hosts the annual invitation-only event for the fourth consecutive year.

As countries pursue independent initiatives to address issues such as alternative energies, energy efficiency, water conservation and air quality, the need for in-depth intelligence on next generation clean technologies has never been more crucial.

At CleanEquity a select group of cleantech companies from around the world will present their technologies to financial and strategic investors, world media, policymakers and end users. Plenary sessions and workshops, led by sector experts, will identify and discuss key industry themes, drivers and constraints, as well as, most importantly, how new technologies will alter cleantech's landscape in the future.

Delegate invitations are reserved only for senior-level representatives. This tried and tested format assures effective use of decision-maker time in ideal surroundings while providing cleantech CEOs access to optimal commercial and strategic acceleration for their companies.

Emphasis will be on direct networking opportunities between investors and entrepreneurs, licensing and procurement, access to widespread media exposure and the clearer understanding of regional environmental policies and fiscal incentives – the necessary and sufficient resources to support a company's growth into and beyond commercial success.

CleanEquity is delighted to have the continued support of The Monaco Chamber of Economic Development, regional hosts for the fourth consecutive year. CleanEquity will also continue to enjoy support of The Prince Albert II of Monaco Foundation and the Monte-Carlo SBM.

The technology companies presenting at the conference must first pass a rigorous selection process using the following criteria: management leadership and experience; robust and verified intellectual property; and, revenue potential. As usual there will be two categories: post, and pre-proof of principal technology companies. The earlier stage companies are known collectively as the "Next Wave".

All presenting companies will be eligible for one of the prestigious international CleanEquity awards as presented by His Serene Highness Prince Albert II of Monaco. Previous winners of CleanEquity awards are assured a presenting role at the following

years' conference; the list for 2011 includes; Sun Catalytix (USA), Novaled AG (Germany) & Oxford Catalysts (UK) from 2010, General Fusion (Canada), Solar ETC (China) & Biograde (Australia) from 2009 and ITM Power (UK), Zenergy Power (Germany) & Clean Diesel Technologies (USA) from 2008.

In addition, in 2010, the first Stelios Young Clean-Tech Entrepreneur of the Year Award was presented to Crijn Bouman and the team at Epyon, who has also been invited back to present at CleanEquity Monaco 2011. With the continuing support of the Stelios Philanthropic Foundation in 2011, Next Wave presenting companies will once more be eligible for the Stelios Young Clean-Tech Entrepreneur of the Year Award.

CleanEquity Monaco is also pleased to continue to work with sponsors Covington & Burling, the global law firm with a strong cleantech division; Invest Securities, a French independent financial services group and Biocode Incubation, a Japanese boutique corporate finance advisory firm focused on cleantech industry.

Those seeking a presenting company role, sponsorship/partnership opportunities, delegate or general enquiries, please see the contact details below or visit the conference website: www.cleanequitymonaco.com
